

Stress Urinary Incontinence Treatment: Acupuncture Treatment for Stress Urinary Incontinence

Objective: To evaluate the acupuncture and physical therapeutic effects in treating stress urinary incontinence. Methods: 30 patients were randomly allocated to either treatment or control group. The control group received kegel exercise and the treatment group received electro-acupuncture at bilateral points BL 33 and 35. The intervention for both groups was 3 sessions per week for 8 weeks. Results: Treatment group: both pad weight and frequency of leakage had p
