

Clinical Supervision in Practice: Some Questions, Answers and Guidelines (Macmillan/NT research)

The emergence of clinical supervision as a major issue on the nursing agenda is an exciting development, offering the profession the opportunity to maximise its potential both in education and practice. But while the topic has been widely debated, implementation has been fraught with difficulties. Now the experience of nurses and policy makers throughout the UK is brought together in this timely publication, so that the profession as a whole can learn from what is happening within its own ranks.
