

Principles and Practice of Restorative Neurology (Butterworth International Medical Review, Neurology, Vol 11)

Until recently regeneration within the CNS was thought to be non-existent and the means were not available to prevent or reduce neural damage and regeneration. This is now changing as research in neuroscience is impacting on clinical practice and therapeutic options are developing rapidly. In this latest volume of the Butterworths International Medical Review series the editors, together with a group of internationally renowned contributors, review clinical and scientific aspects of the emerging speciality of restorative neurology.
