According to the preface, The purpose **Chapter 2: Hemispheric function** Much of what is known about brain function is owed to Roger Sperry, The brains right hemisphere controls the muscles on the left side of the **Cerebrum (Right And Left) Anatomy, Function & Diagram Body Maps** For higher cortical functions of the right hemisphere, as in the rest of the central nervous system, the locus of the lesion is critical for the nature of the deficit. Thus, provided we know where a person is looking, it is possible to present stimuli to the left or to the right cerebral hemisphere. It is important to note that such **Functions of the Right Cerebral Hemisphere - NCBI - NIH** The right cerebral hemisphere controls movement of the left side of the body. Depending on the severity, a stroke affecting the right cerebral hemisphere may result in functional loss or motor skill impairment of the left side of the body. **AlzOnline : Chapter 1: The Brain** The cerebral hemispheres are the highest level of the Central Nervous System. bulging of the left and right front end of the brain stem, as shown in Figure 1 at the right. It is essential for the highest levels of mental and behavioral functions. **none** The cerebrum (right and left) is the upper, front portion of the brain and consists of two hemispheres, or halves. The two hemispheres are connected by the **Right cerebral hemispheric function: behavioral correlates**. - **NCBI** However, the cerebral hemispheres are divided right down the middle into a right hemisphere and a left hemisphere. The right side of the brain controls muscles on the left side of the body and the left side of the brain **Dominant Functions. Lateralization of brain function - Wikipedia** The brain has two halves or hemispheres: right and left. The right hemisphere controls the left side of the body, and the left hemisphere controls the right side. **Cerebral hemisphere - Wikipedia** The cerebral hemisphere is one half of the cerebrum, the part of the brain that controls muscle functions and also controls speech, thought, emotions, reading, The right hemisphere controls the muscles on the left side of the body, and the left **Neuroscience For Kids - Hemispheres Language in the Right Cerebral Hemisphere - ARTICLES Physiology** Start studying Cerebral Hemisphere Function.
