

Crises Management: A Comprehensive Strategic Approach: Crises Management

This book aims at developing an effective framework for strategic decisional alert and intervention center in Jordan that specifically handles critical issues related to all security issues and crises in an inclusive manner. Such a framework is needed especially because a comprehensive approach for tackling all types of threats and hazards at all levels is lacking. The underlying vision of this book is to build a resilient country that is highly and quickly responsive to sources of uncertainty in its strategic environment; both internally and externally. This issue is very significant to Jordan given that it tackles a tolerant-free and critical dilemma at the national level in a timely manner.
