

## Therapeutic Neuroscience Education: Teaching Patients About Pain, A Guide for Clinicians (2013 Edition) By Adriaan Louw Ph.D.

Discover how teaching patients about pain can treat their chronic pain, instead of just manage it, in Therapeutic Neuroscience Education. Evidence shows that patients who better understand their pain, and what pain truly is, experience less pain, have less fear, move better, exercise more and can regain hope. In this textbook, physical therapists Adriaan Louw and Emilio Puentedura deliver an evidence-based perspective on how the body and brain collaborate to create pain, teach how to convey this view of pain to patients, and demonstrate how to integrate therapeutic neuroscience education into a practice. Written by Adriaan Louw and Emilio Puentedura. Illustrated. Softcover, 304 pages.
