

## Philosophical transactions: giving some account of the present undertakings, studies and labours of the ingenious in many considerable parts of the world. Volume 24 of 91

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Medical theory and practice of the 1700s developed rapidly, as is evidenced by the extensive collection, which includes descriptions of diseases, their conditions, and treatments. Books on science and technology, agriculture, military technology, natural philosophy, even cookbooks, are all contained here.++++The below data was compiled from various identification fields in the bibliographic record of this title. This data is provided as an additional tool in helping to insure edition identification:++++British LibraryP002656Originally edited by Henry Oldenburg, later by N. Grew, R. Plot, W. Musgrave, R. Waller, Sir H. Sloane, E. Halley, and C. Mortimer. Since March 1752 publication has been supervised by a committee of the Royal Society. Some imprints include year of publicLondon [England] : printed by T.N. for John Martyn at the Bell, a little without Temple-Bar, printer to the Royal Society. v. : ill., tables ; sm. 4; lge. 4
