

Practical Obstetrics (Classic Reprint)

Excerpt from Practical Obstetrics
In preparing the present edition of this Manual a further increase in size has been found necessary in order to include the advances in various subjects which have been made during the last three years. The introduction of Abderhaldens Test, and the progress which has been made in our knowledge of the pregnancy changes in the endocrinous glands, has altered the aspect of the General Physiology of Pregnancy so much that this section has been entirely re-written. The description of the Toxaemias of Pregnancy, and of the obstetric treatment of Eclampsia, has also been completely revised. The valuable work of British obstetricians in recognising and explaining the Local Contraction Ring as a cause of obstruction in labour has been taken advantage of, and an attempt made to classify the different varieties of overaction of the parturient uterus. The treatment of Placenta Prævia has also been completely revised. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
