

# RECALLED ONCOLOGY BOARD REVIEW QUESTIONS - 96% Pass Rate

Dear Medical Personnel, Welcome! We have put together 100s of the most recently Recalled Board Review Questions with Answers. Our pass rate is 96%. On our website CancerGroup.com, you can read more about this book and testimonials from Physicians who passed the boards just by reading our book, PLUS other important information. Some of the Department Heads, hospitals and residents using our books are Mayo Clinic, Harvard University, Columbia, NYU, UCLA, Johns Hopkins, MD Anderson Cancer Center Orlando, Tift Regional Cancer Center, Instituto Oncologia Moderna, Puerto Rico plus many others. We at CancerGroup.com, appreciate the voluminous amount of new information that we should be digesting in our day-to-day practice. Perhaps you have felt the same frustration, attempting to assimilate an unwieldy and often contradictory mountain of information about cancer. Reading newer textbooks is time-consuming, and frankly difficult to remember. Reviews are often shallow, highly technical, and also hard to recall later! As Physicians, we are naturally expected to be proficient in our knowledge of both basic science and clinical aspects of cancer medicine. The importance of maintaining an updated knowledge base was recently demonstrated by the new institution of time-limited Board Certification every 10 years. We need to have instant access to a vast storehouse of knowledge, for both exams and our daily practice and teaching of cancer medicine. How can we obtain this information in the most efficient manner, given the time constraints of seeing patients, spending time with family, important leisure and the vicissitudes of life? We have taken much study time to develop something that was sorely lacking when we were residents, that is an easy-to-use, easy to master (and keep current with) the foundations of cancer

academics. We have developed a series of reviews which covers the following aspects of the commonest cancers, in a standardized format: Definition Epidemiology Risk Factors Basic Science, Oncogenes Natural History Workup Current Staging Landmark Studies Conventional Studies: Treatments/Results Latest Studies: Treatment/Results Many physicians have told us that they wished that the above information had been available, in a coherent fashion, when they were groping to understand the basics of cancer medicine! Through extensive review of textbooks and published articles, we are now making this information readily available to you in a concise, succinct and affordable paperback review series. We have collected and collated this data, looking for the common themes in newer textbooks, review courses, lectures, and seminars. We at CancerGroup.com, an organization dedicated to promoting awareness of cancer treatments, are continuing to develop new reviews. These will help provide a comprehensive, cohesive way to master pertinent information. We look forward to providing you with the best possible information. Check the sample pages before you buy, to make sure this is what you require. Radiation Oncology Study Guide. 100s of Questions with Answers, Definitions and Rationales.
