

# A National Cancer Clinical Trials System for the 21st Century: Reinvigorating the NCI Cooperative Group Program

The National Cancer Institutes (NCI) Clinical Trials Cooperative Group Program has played a key role in developing new and improved cancer therapies. However, the program is falling short of its potential, and the IOM recommends changes that aim to transform the Cooperative Group Program into a dynamic system that efficiently responds to emerging scientific knowledge; involves broad cooperation of stakeholders; and leverages evolving technologies to provide high-quality, practice-changing research.

**A National Cancer Clinical Trials System for the 21st Century** A National Cancer. Clinical Trials System for the 21st Century. Reinvigorating the NCI. Cooperative Group Program. Advances in biomedical research continue
