

Transformative Vision: Reflections on the Nature and History of Human Expression

Reprint of Jose Arguelles widely-acclaimed art and cultural history/planetary treatise. Originally published in 1975, this edition includes a new introduction and full-color cover painting that tie the authors past work to his on-going efforts. The exploration of the split between science and art and the authors call for uniting these two aspects into wholeness within our fragile total environment has perhaps more relevance now than at the time the book was first published.
