

Project Based Innovation and Learning: Concepts and Research

The increasing integration of economies and societies around the world, decreasing product life cycle and volatile market are the biggest challenges for the organizations. These factors become more crucial in project based organizations due to their different structure and approach hence traditional business approaches are no more adequate for the project based organizations. This book, therefore, introduces a new perspective on innovation and learning in project based organizations. The book addresses the issues from the practitioners as well as academic researchers point of view. Concepts of project based innovation and learning are discussed with the help of a case study for better understanding and to give a practitioners approach. This book is an essential reading for professionals and management students in project based innovation and learning area.
