

## The Voodoo Kings

The contents of this work have been mostly freestyle to preserve authenticity. The following work is the result of the desire of Baba Meddahocis to reach a larger audience, and to spread the worship of Aseese throughout the world. His prolific and dedicated work stands as an inspiration to all who pursue this philosophy of life. Meddahocci, as well as many of his contemporaries offered many suggestions as to pursuing this way of life in the new world. The first of which is to change your name. The second suggestion is to change your mode of dress. The third suggestion was that Ifa is to be practiced in community. This work is presented here to preserve this intellectual property.
